

Instant Taipei

- 4th Class Design Studio, Spring 2006

The Instant Taipei design course will be divided roughly in two parts. First, the students must study the nomadic layer on top of the official Taipei and nomadic cultures in general. Secondly, the students must produce architectonic solutions based on the research of the present day and historical nomadism. The course will include research, design tasks and 1:1 scale construction tasks.

The last leg of the course aims in realizing a bigger scale structure as a group work.
