# Case Study for Information Management 資訊管理個案 Building Information Systems: Electronic Medical Records

1031CSIM4C13 TLMXB4C (M1824) Tue 2, 3, 4 (9:10-12:00) B425

(Chap. 13)

Min-Yuh Day 戴敏育 Assistant Professor 專任助理教授

**Dept. of Information Management, Tamkang University** 

淡江大學 資訊管理學系

http://mail. tku.edu.tw/myday/ 2014-12-23

## 課程大綱 (Syllabus)

- 週次 (Week) 日期 (Date) 內容 (Subject/Topics)
- 1 103/09/16 Introduction to Case Study for Information Management
- 2 103/09/23 Information Systems in Global Business: UPS (Chap. 1)
- 3 103/09/30 Global E-Business and Collaboration: NTUC Income (Chap. 2)
- 4 103/10/07 Information Systems, Organization, and Strategy: iPad and Apple (Chap. 3)
- 5 103/10/14 IT Infrastructure and Emerging Technologies: Salesforce.com (Chap. 5)
- 6 103/10/21 Foundations of Business Intelligence: Lego (Chap. 6)

## 課程大綱 (Syllabus)

- 週次 (Week) 日期 (Date) 內容 (Subject/Topics)
- 7 103/10/28 Telecommunications, the Internet, and Wireless Technology: Google, Apple, and Microsoft (Chap. 7)
- 8 103/11/04 Securing Information System: Facebook (Chap. 8)
- 9 103/11/11 Midterm Report (期中報告)
- 10 103/11/18 期中考試週
- 11 103/11/25 Enterprise Application: Border States Industries Inc. (BSE) (Chap. 9)
- 12 103/12/02 E-commerce: Amazon vs. Walmart (Chap. 10)

## 課程大綱 (Syllabus)

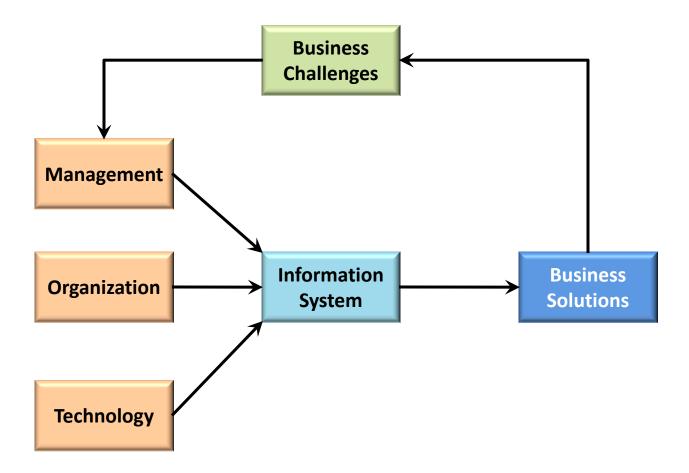

週次 日期 內容(Subject/Topics) 13 103/12/09 Knowledge Management: Tata Consulting Services (Chap. 11) 14 103/12/16 Enhancing Decision Making: CompStat (Chap. 12) 15 103/12/23 Building Information Systems: Electronic Medical Records (Chap. 13) Managing Projects: JetBlue and WestJet (Chap. 14) 16 103/12/30 Final Report I (期末報告I) 17 104/01/06 Final Report II (期末報告Ⅱ) 18 104/01/13 期末考試週

# Chap. 13 Building Information Systems: Electronic Medical Records

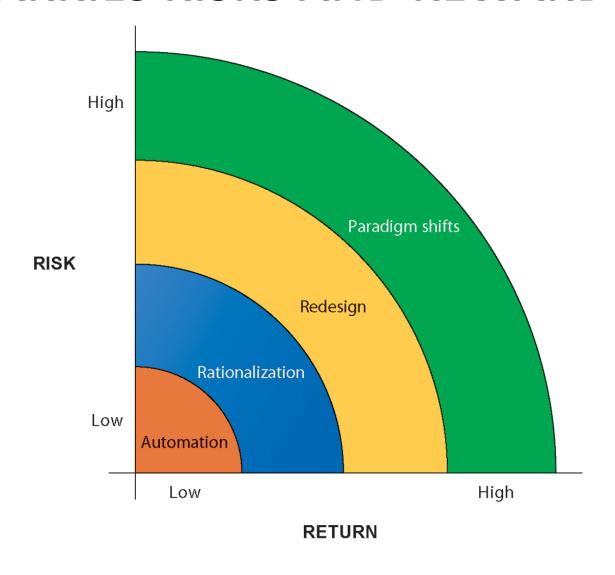

## Case Study: Electronic Medical Records Are Electronic Medical Records a Cure for Health Care? (Chap. 13)

- 1. What management, organization, and technology factors are responsible for the difficulties in building electronic medical record systems? Explain your answer.
- 2. What stages of system-building will be the most difficult for building electronic medical record systems? Explain your answer.
- 3. What is the business and social impact of not digitizing medical records (to individual physicians, hospitals, insurers, patients)?
- 4. What are business and social benefits of digitizing medical recordkeeping?
- 5. Name two important information requirements for physicians, two for patients, and two for hospitals that should be addressed by electronic medical records systems.
- 6. Diagram the "as-is" and "to-be" process for prescribing a medication for a patient if an EMR system is implemented.

## Overview of Fundamental MIS Concepts

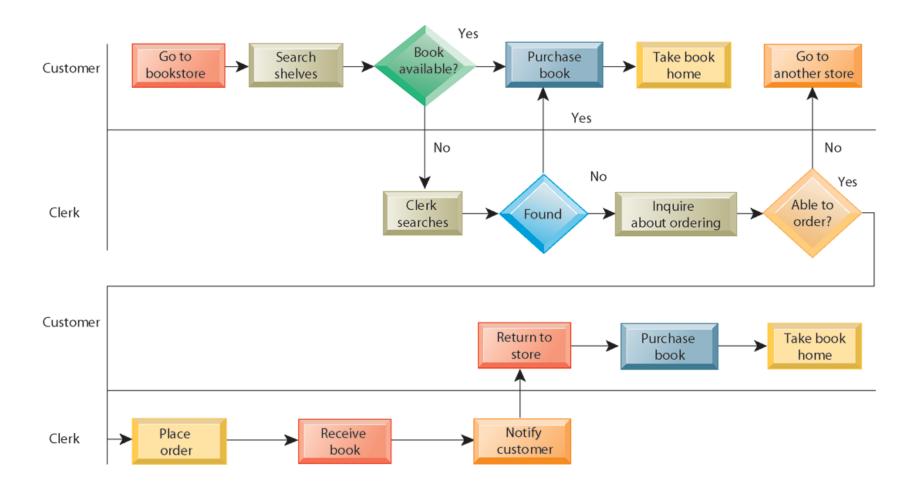

## ORGANIZATIONAL CHANGE CARRIES RISKS AND REWARDS

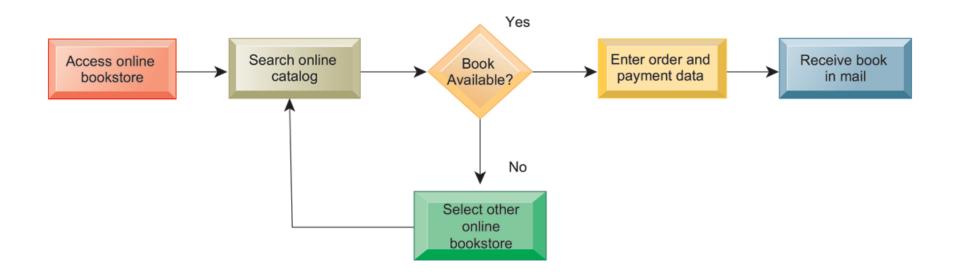

## Business Process Management (BPM)

- Business Process Management (BPM)
  - Variety of tools, methodologies to analyze, design, optimize processes
  - Used by firms to manage business process redesign
- Steps in BPM
  - 1. Identify processes for change
  - 2. Analyze existing processes
  - 3. Design the new process
  - 4. Implement the new process
  - 5. Continuous measurement

## AS-IS BUSINESS PROCESS FOR PURCHASING A BOOK FROM A PHYSICAL BOOKSTORE

## REDESIGNED PROCESS FOR PURCHASING A BOOK ONLINE

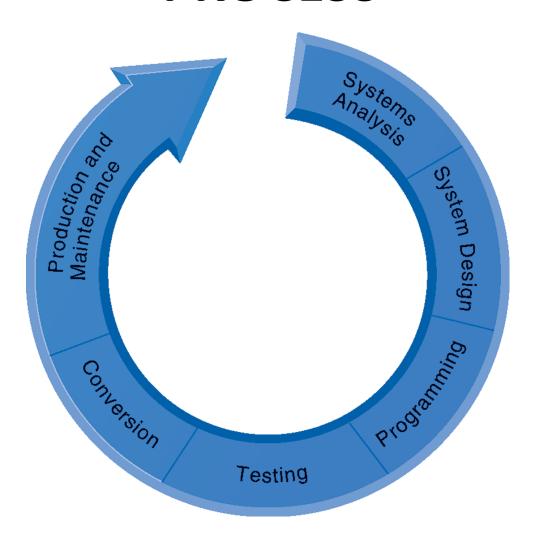

### **Business Process Redesign**

- Variety of tools for BPM, to
  - Identify and document existing processes
    - Identify inefficiencies
  - Create models of improved processes
  - Capture and enforce business rules for performing processes
  - Integrate existing systems to support process improvements
  - Verify that new processes have improved
  - Measure impact of process changes on key business performance indicators

### Systems Development (SD)

- Activities that go into producing an information system solution to an organizational problem or opportunity
  - 1. Systems analysis
  - 2. Systems design
  - 3. Programming
  - 4. Testing
  - 5. Conversion
  - 6. Production and maintenance

## THE SYSTEMS DEVELOPMENT PROCESS

### Systems Analysis (SA)

- Analysis of problem to be solved by new system
  - Defining the problem and identifying causes
  - Specifying solutions
    - Systems proposal report identifies and examines alternative solutions
  - Identifying information requirements
- Includes feasibility study
  - Is solution feasible and good investment?
  - Is required technology, skill available?

## System Analysis (SA) (cont.)

- Establishing information requirements
  - Who needs what information, where, when, and how
  - Define objectives of new/modified system
  - Detail the functions new system must perform
- Faulty requirements analysis is leading cause of systems failure and high systems development cost

### Systems Design (SD)

- Describes system specifications that will deliver functions identified during systems analysis
- Should address all managerial, organizational, and technological components of system solution
- Role of end users
  - User information requirements drive system building
  - Users must have sufficient control over design process to ensure system reflects their business priorities and information needs
  - Insufficient user involvement in design effort is major cause of system failure

## Systems Design: Design Specifications

#### **OUTPUT**

Medium

Content

Timing

#### **INPUT**

Origins

Flow

Data entry

#### **USER INTERFACE**

Simplicity

Efficiency

Logic

Feedback

**Errors** 

#### **DATABASE DESIGN**

Logical data model Volume and speed

requirements

File organization and

design

Record specifications

#### **PROCESSING**

Computations

Program modules

Required reports

Timing of outputs

#### **MANUAL PROCEDURES**

What activities

Who performs them

When

How

Where

#### **CONTROLS**

Input controls (characters, limit, reasonableness)
Processing controls (consistency, record counts)

Output controls (totals, samples of output)

Procedural controls (passwords, special forms)

#### **SECURITY**

Access controls

Catastrophe plans

Audit trails

#### **DOCUMENTATION**

Operations documentation

Systems documents

User documentation

#### **CONVERSION**

Transfer files

Initiate new procedures

Select testing method

Cut over to new system

#### **TRAINING**

Select training techniques

Develop training modules

Identify training facilities

#### **ORGANIZATIONAL CHANGES**

Task redesign

Job redesign

Process design

Organization structure design

Reporting relationships

## Completing the Systems Development Process

### Programming:

 System specifications from design stage are translated into software program code

#### Testing

- Ensures system produces right results
- Unit testing: Tests each program in system separately
- System testing: Test functioning of system as a whole
- Acceptance testing: Makes sure system is ready to be used in production setting
- Test plan: All preparations for series of tests

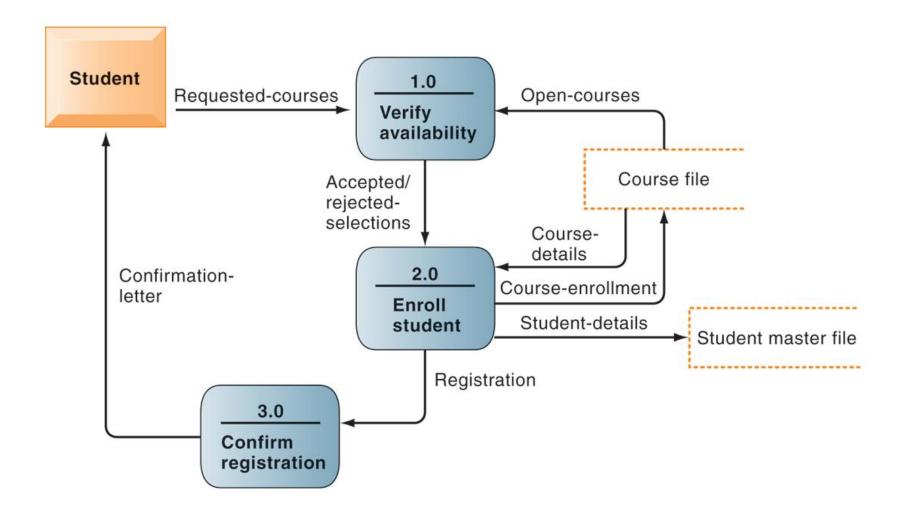

## A SAMPLE TEST PLAN TO TEST A RECORD CHANGE

Procedure Address and M "Record Chan				Test Series 2		
	Prepared By:	ı	Date:	Version	1:	
Test Ref.	Condition Tested	Special Require	ments	Expected Results	Output On	Next Screen
2.0	Change records					
2.1	Change existing record	Key field		Not allowed		
2.2	Change nonexistent record	Other fields		"Invalid key" message		
2.3	Change deleted record	Deleted record in be available	must	"Deleted" message		
2.4	Make second record	Change 2.1 abo	ve	OK if valid	Transaction file	V45
2.5	Insert record			OK if valid	Transaction file	V45
2.6	Abort during change	Abort 2.5		No change	Transaction file	V45

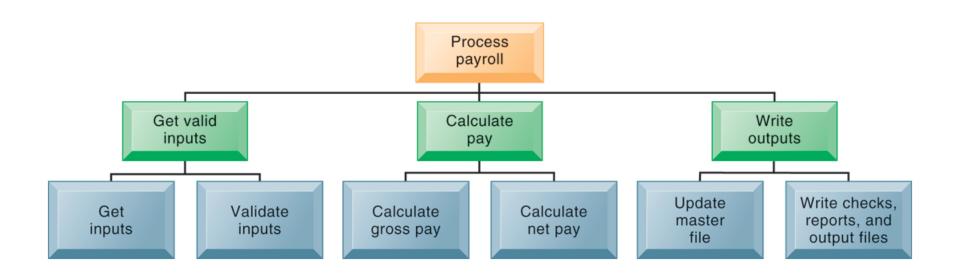

### **Systems Development**

SUMMARY OF SYSTEMS DEVELOPMENT ACTIVITIES						
CORE ACTIVITY	DESCRIPTION					
Systems analysis	Identify problem(s) Specify solutions Establish information requirements					
Systems design	Create design specifications					
Programming	Translate design specifications into code					
Testing	Unit test Systems test Acceptance test					
Conversion	Plan conversion Prepare documentation Train users and technical staff					
Production and maintenance	Operate the system Evaluate the system Modify the system					

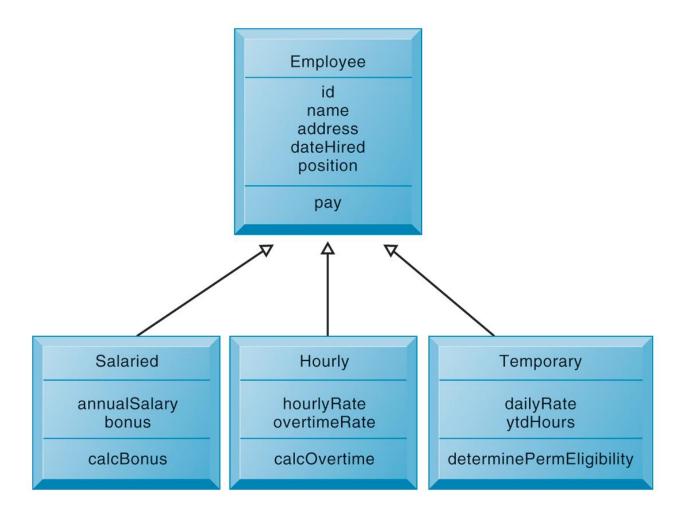

## DATA FLOW DIAGRAM FOR MAIL-IN UNIVERSITY REGISTRATION SYSTEM

## HIGH-LEVEL STRUCTURE CHART FOR A PAYROLL SYSTEM

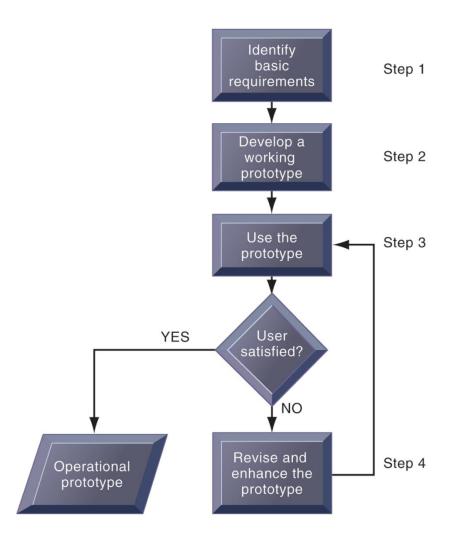

### **CLASS AND INHERITANCE**

## Alternative Systems-Building Methods

- 1. Traditional systems life-cycle
- 2. Prototyping
- 3. End-user development
- 4. Application software packages
- 5. Outsourcing

### THE PROTOTYPING PROCESS

## TOTAL COST OF OFFSHORE OUTSOURCING

TOTAL COST OF OFFSHORE OUTSOURCING									
Cost of outsourcing contract	\$10, 000, 000								
Hidden Costs	Best Case	Additional Cost (\$)	Worst Case	Additional Cost (\$)					
1. Vendor selection	0%	20,000	2%	200,000					
2. Transition costs	2%	200,000	3%	300,000					
3. Layoffs & retention	3%	300,000	5%	500,000					
4. Lost productivity/cultural issues	3%	300,000	27%	2,700,000					
5. Improving development processes	1%	100,000	10%	1,000,000					
6. Managing the contract	6%	600,000	10%	1,000,000					
Total additional costs		1,520,000		5,700,000					
	Outstanding Contract (\$)	Additional Cost (\$)	Total Cost (\$)	Additional Cost					
Total cost of outsourcing (TCO) best case	10,000,000	1,520,000	11,520,000	15.2%					
Total cost of outsourcing (TCO) worst case	10,000,000	5,700,000	15,700,000	57.0%					

## Application Development for the Digital Firm

- Rapid Application Development (RAD)
  - Joint Application Design (JAD)
  - Agile Development
- Component-based Development and Web Services
  - Component-based Development
  - Web Services and Service-Oriented Computing

## Rapid Application Development (RAD)

- Process of creating workable systems in a very short period of time
- Utilizes techniques such as:
  - Visual programming and other tools for building graphical user interfaces
  - Iterative prototyping of key system elements
  - Automation of program code generation
  - Close teamwork among end users and information systems specialists

## Joint Application Design (JAD)

- Used to accelerate generation of information requirements and to develop initial systems design
- Brings end users and information systems specialists together in interactive session to discuss system's design
- Can significantly speed up design phase and involve users at intense level

### **Agile Development**

- Focuses on rapid delivery of working software by breaking large project into several small sub-projects
- Subprojects
  - Treated as separate, complete projects
  - Completed in short periods of time using iteration and continuous feedback
- Emphasizes face-to-face communication over written documents, allowing collaboration and faster decision making

### **Component-based Development**

- Groups of objects that provide software for common functions (e.g., online ordering) and can be combined to create large-scale business applications
- Web services
  - Reusable software components that use XML and open Internet standards (platform independent)
  - Enable applications to communicate with no custom programming required to share data and services
  - Can engage other Web services for more complex transactions
  - Using platform and device-independent standards can result in significant cost-savings and opportunities for collaboration with other companies

### Case Study: JetBlue and WestJet

### JetBlue and WestJet: A Tale of Two IS Projects (Chap. 14)

- 1. How important is the reservation system at airlines such as WestJet and JetBlue? How does it impact operational activities and decision making?
- 2. Evaluate the key risk factors of the projects to upgrade the reservation systems of WestJet and JetBlue.
- 3. Classify and describe the problems each airline faced in implementing its new reservation system. What management, organization, and technology factors caused those problems?
- 4. Describe the steps you would have taken to control the risk in these projects.

## 資訊管理個案 (Case Study for Information Management)

- 1. 請同學於資訊管理個案討論前 應詳細研讀個案,並思考個案研究問題。
- 2. 請同學於上課前複習相關資訊管理相關 理論,以作為個案分析及擬定管理對策的 依據。
- 3. 請同學於上課前 先繳交個案研究問題書面報告。
