4. Building and Managing Systems

Chap. 10
E-commerce:
Digital Markets, Digital Goods:
Zagat
Case Study:

E-commerce: Zagat (Chap. 10) (pp.443-445)

To Pay or Not to Pay: Zagat’s Dilemma

1. Evaluate Zagat using the competitive forces and value chain models.

2. Compare Zagat’s and Yelp’s e-commerce business models. How have those models affected each company's Web strategy?

3. Why was Zagat’s content well suited for the Web and for the mobile digital platform?

4. Do you think Zagat’s decision to use a pay wall for its Web site was a mistake? Why or why not?

5. Will Zagat’s acquisition by Google make it more competitive? Explain your answer.

Overview of Fundamental MIS Concepts

Business Model

1. Customer Segments
2. Value Proposition
3. Channels
4. Customer Relationships
5. Revenue Streams
6. Key Activities
7. Key Resources
8. Key Partners
9. Cost Structure

The Growth of E-Commerce
8 Unique Features of E-commerce

1. Ubiquity
2. Global reach
3. Universal standards
4. Richness
5. Interactivity
6. Information density
7. Personalization/Customization
8. Social technology

Ubiquity

• Internet/Web technology available everywhere: work, home, and so on, anytime.

• Effect:
  – Marketplace removed from temporal, geographic locations to become “marketspace”
  – Enhanced customer convenience and reduced shopping costs

• Reduces transaction costs
  – Costs of participating in market

Global reach

• The technology reaches across national boundaries, around Earth

• Effect:
  – Commerce enabled across cultural and national boundaries seamlessly and without modification.
  – Marketspace includes, potentially, billions of consumers and millions of businesses worldwide.

Universal standards

• One set of technology standards: Internet standards

• Effect:
  – Disparate computer systems easily communicate with one another
  – Lower market entry costs—costs merchants must pay to bring goods to market
  – Lower consumers’ search costs—effort required to find suitable products

Richness

• Supports video, audio, and text messages

• Effect:
  – Possible to deliver rich messages with text, audio, and video simultaneously to large numbers of people.
  – Video, audio, and text marketing messages can be integrated into single marketing message and consumer experience.

Interactivity

• The technology works through interaction with the user.

• Effect:
  – Consumers engaged in dialog that dynamically adjusts experience to the individual.
  – Consumer becomes co-participant in process of delivering goods to market.

Information density

• Large increases in information density—the total amount and quality of information available to all market participants

• Effect:
  – Greater price transparency
  – Greater cost transparency
  – Enables merchants to engage in price discrimination

Personalization/Customization

• Technology permits modification of messages, goods

• Effect:
  – Personalized messages can be sent to individuals as well as groups.
  – Products and services can be customized to individual preferences.

Social technology

• The technology promotes user content generation and social networking

• Effect:
  – New Internet social and business models enable user content creation and distribution, support social networks
  – Many-to-many model

Effect of the Internet on the marketplace

• Reduces information asymmetry
• Offers greater flexibility and efficiency because of:
  – Reduced search costs and transaction costs
  – Lower menu costs
  – Greater price discrimination
  – Dynamic pricing
• May reduce or increase switching costs
• May delay gratification: effects dependent on product
• Increased market segmentation
• Stronger network effects
• More disintermediation

The Benefits of Disintermediation to the Consumer

Digital goods

• Goods that can be delivered over a digital network
  – For example: music tracks, video, software, newspapers, books
• Cost of producing first unit is almost entire cost of product
• Costs of delivery over the Internet very low
• Marketing costs remain the same; pricing highly variable
• Industries with digital goods are undergoing revolutionary changes (publishers, record labels, etc.)

Types of E-Commerce

• Three major types of e-commerce
  – Business-to-Consumer (B2C)
    • Example: BarnesandNoble.com
  – Business-to-Business (B2B)
    • Example: ChemConnect
  – Consumer-to-Consumer (C2C)
    • Example: eBay

• E-commerce can be categorized by platform
  – Mobile Commerce (m-commerce)

E-commerce

Business Models

1. E-tailer
2. Transaction broker
3. Market creator
4. Content provider
5. Community provider
6. Portal
7. Service provider

E-commerce

Revenue Models

1. Advertising
2. Sales
3. Subscription
4. Free/Freemium
5. Transaction Fee
6. Affiliate

9 Cost Structure 5 Revenue Streams

Definition of Business Model

A business model describes the rationale of how an organization creates, delivers, and captures value.

Definition of Business Strategy

A business strategy is a long term plan of action designed to achieve a particular goal or set of goals or objectives.

Source: (Ostenwalder, Pigneur and Tucci, 2005)
Business

• “the activity of providing goods and services involving financial, commercial and industrial aspects.” (WordNet 2.0)

Source: (Ostenwalder, Pigneur and Tucci, 2005)
Model

• “a simplified description and representation of a complex entity or process.” (WordNet 2.0)

Source: (Ostenwalder, Pigneur and Tucci, 2005)
Business Model

• A business model is a conceptual tool containing a set of objects, concepts and their relationships with the objective to express the business logic of a specific firm.

• Therefore we must consider which concepts and relationships allow a simplified description and representation of what value is provided to customers, how this is done and with which financial consequences.

Business Model Concept Hierarchy

Source: (Ostenwalder, Pigneur and Tucci, 2005)
Evolution of the Business Model Concept

Source: (Ostenwalder, Pigneur and Tucci, 2005)
Business Model vs. Business Process Model

• Business Model
  – a view of the firm's logic for creating and commercializing value

• Business process model
  – how a business case is implemented in processes

Source: (Ostenwalder, Pigneur and Tucci, 2005)
Business Model vs. Strategy

• Business Models
  – a system that shows how the pieces of a business fit together.
  – an abstraction of a firm's strategy

• Strategy
  – includes competition

Source: (Ostenwalder, Pigneur and Tucci, 2005)
Implementing Business Models

Design Business Model

Management defines and designs a business concept that responds to market circumstances

Finance Business Model

Management works out a financial structure for the business model (e.g. internal funding, venture capital, stock)

Implement Business Model

The business model is implemented into business structure, business processes and

Planning, Changing and Implementing Business Models

The management analyzes the current business model's adequacy to environmental pressures and designs a new business model.

The new business model becomes a goal to achieve and guides planning, change and implementation.

Source: (Ostenwalder, Pigneur and Tucci, 2005)
Managers are aware of the use of Information Systems to realize goals, exploit opportunities and obtain competitive advantage.

Information Systems support the company's business model and are targeted on areas that are critical to successful business performance.

Business Model Canvas Explained

Source: http://www.youtube.com/watch?v=QoAOzMTLP5s
The 9 Building Blocks of Business Model

1. Customer Segments
2. Customer Relationships
3. Channels
4. Revenue Streams
5. Key Resources
6. Key Activities
7. Value Proposition
8. Key Partners
9. Cost Structure

The 9 Building Blocks of Business Model

1. Customer Segments

Defines the different groups of people or organizations an enterprise aims to reach and serve.

2. Value Propositions

Describes the bundle of products and services that create value for a specific Customer Segment

3. Channels

Describes how a company communicates with and reaches its Customer Segments to deliver a Value Proposition

4. Customer Relationships

Describes the types of relationships a company establishes with specific Customer Segments

5. Revenue Streams

Represents the cash a company generates from each Customer Segment (costs must be subtracted from revenues to create earnings)

6. Key Resources

Describes the most important assets required to make a business model work

7. Key Activities

Describes the most important things a company must do to make its business model work

8. Key Partnerships

Describes the network of suppliers and partners that make the business model work

9. Cost Structure

Describes all costs incurred to operate a business model

The 9 Building Blocks of Business Model

1. Customer Segments
   – An organization serves one or several Customer Segments.

2. Value Propositions
   – It seeks to solve customer problems and satisfy customer needs with value propositions.

3. Channels
   – Value propositions are delivered to customers through communication, distribution, and sales Channels.

4. Customer Relationships
   – Customer relationships are established and maintained with each Customer Segment.

5. Revenue Streams
   – Revenue streams result from value propositions successfully offered to customers.

6. Key Resources
   – Key resources are the assets required to offer and deliver the previously described elements...

7. Key Activities
   – ...by performing a number of Key Activities.

8. Key Partnerships
   – Some activities are outsourced and some resources are acquired outside the enterprise.

9. Cost Structure
   – The business model elements result in the cost structure.

Business Model

1. Customer Segments
2. Value Proposition
3. Channels
4. Customer Relationships
5. Revenue Streams
6. Key Activities
7. Key Resources
8. Key Partners
9. Cost Structure

Business Model Generation

Business Model Generation

**THE CANVAS OF BUSINESS MODEL GENERATION**

**Production and Logistics**
Anything beyond content creation is outsourced to readily available service providers.

**Differentiation**
An entirely different format, business model, and story for the book makes it stand out in a crowded market.

**Community**
The book is co-created with practitioners from around the world who feel ownership thanks to attribution as contributing co-authors.

** Buyers**
Paying customers are not only readers, but co-creators and companies that want customized books for their employees and clients.

Come up with Killer Startup ideas

![Uber logo]

**REDUCE**
- Time to wait
- Hassels of paying money
- Insure fare & waiting time

**CREATE**
- Ease of use
- Platform connecting customers & drivers
- Extra Revenues for Drivers

**RAISE**
- Chances of getting taxis
- Quality (ratings)
- Assurance (Location tracking)

**ELIMINATE**
- Uncertainty of getting taxis
- Waving hands to stop taxi

Structure of a Business Model

1. Who is your target market?
2. What do you offer to the customer?
3. How is the value proposition created?
4. How is revenue created?

Customer Value
Marketing

“Meeting needs profitably”

Value

the sum of the tangible and intangible benefits and costs

Customer Value Triad

Quality, Service, and Price (qsp)

Value and Satisfaction

• Marketing
  – identification, creation, communication, delivery, and monitoring of customer value.

• Satisfaction
  – a person’s judgment of a product’s perceived performance in relationship to expectations

Building Customer Value, Satisfaction, and Loyalty

Customer Perceived Value

Total customer benefit

- Product benefit
- Services benefit
- Personnel benefit
- Image benefit

Total customer cost

- Monetary cost
- Time cost
- Energy cost
- Psychological cost

Satisfaction

“a person’s feelings of pleasure or disappointment that result from comparing a product’s perceived performance (or outcome) to expectations”

Loyalty

“a deeply held commitment to rebuy or repatronize a preferred product or service in the future despite situational influences and marketing efforts having the potential to cause switching behavior.”

Customer Perceived Value, Customer Satisfaction, and Loyalty

Nothing is so practical as a good theory.

Social Networking and the Wisdom of Crowds

• Most popular Web 2.0 service: social networking
  – Social shopping sites: Swap shopping ideas with friends
• Wisdom of crowds
• Crowdsourcing
  – Large numbers of people can make better decisions about topics and products than a single person.
• Prediction markets
  – Peer-to-peer betting markets on specific outcomes (elections, sales figures, designs for new products)

E-commerce Marketing

• Internet provides new ways to identify and communicate with customers.

• Long tail marketing:
  – Ability to reach a large audience inexpensively

• Behavioral targeting:
  – Tracking online behavior of individuals on thousands of Web sites

• Internet advertising formats
  – Search engine marketing, display ads, rich media, e-mail, and so on

Web Site Personalization

Based on your portfolio and recent market trends, here are some recommendations.

Welcome back, Steve P. Munson. Check out these recommended titles:
- One Minute Manager
- Leading Change
- Results-Based Leadership

Sarah,
Here are the items you want to bid on:
- Halogen reading lamp
- Portable reading lamp
- LED book reading lamp

How an Advertising Network Works

Merchant Site

- Merchant server connects to DoubleClick ad server

Advertising Network

- Ad server reads cookie; checks database for profile
- Ad server selects and serves an appropriate banner ad based on profile
- DoubleClick follows consumer from site to site through use of tracking programs

Consumer

- Consumer requests Web page from ad network member site

Social E-commerce

• Social e-commerce:
  – Based on digital social graph
    • Mapping of all significant online relationships

• Four features of social e-commerce driving its growth
  – Social sign-on
  – Collaborative shopping
  – Network notification
  – Social search (recommendations)

Social Media Marketing

• Social media:
  – Fastest growing media for branding and marketing

• Social network marketing:
  – Seeks to leverage individuals influence over others in social graph
  – Target is a social network of people sharing interests and advice
  – Facebook’s “Like button”
  – Social networks have huge audiences
  – Facebook: 150 million U.S. visitors monthly

B2B E-commerce

• U.S. B2B trade in 2012 is $16 trillion
• U.S. B2B e-commerce in 2012 is $4.1 trillion
• Procurement requires significant overhead costs, which Internet and networking helps automate
• Variety of Internet-enabled technologies used in B2B
  – Electronic data interchange (EDI)
  – Private industrial networks (private exchanges)
  – Net marketplaces
  – Exchanges

Electronic Data Interchange (EDI)

A Private Industrial Network

Net Marketplaces (e-hubs)

- Single market for many buyers and sellers
- Industry-owned or owned by independent intermediary
- Generate revenue from transaction fees, other services
- Use prices established through negotiation, auction, RFQs, or fixed prices
- May focus on direct or indirect goods
- May be vertical or horizontal marketplaces

A Net Marketplace

- Catalogs
- Sourcing
- Automated purchasing
- Processing and fulfillment

Exchanges

• Independently owned third-party Net marketplaces
• Connect thousands of suppliers and buyers for spot purchasing
• Typically provide vertical markets for direct goods for single industry (food, electronics)
• Proliferated during early years of e-commerce; many have failed
  – Competitive bidding drove prices down and did not offer long-term relationships with buyers or services to make lowering prices worthwhile.

The Mobile Digital Platform and Mobile E-commerce

M-commerce

• In 2012 is 10% of all e-commerce
• Fastest growing form of e-commerce
  – Some areas growing at 50%
• Four billion mobile phone users worldwide
• Main areas of growth
  – Retail sales at top Mobile 400 (Amazon, eBay, etc.)
  – Sales of digital content (music, TV, etc.)
  – Local search for restaurants, museums, stores

Consolidated Mobile Commerce Revenues

Location-based services

• Used by 74% of smartphone owners
• Based on GPS map services
• Types
  – Geosocial services
    • Where friends are
  – Geoadvertising
    • What shops are nearby
  – Geoinformation services
    • Price of house you are passing

Other Mobile Commerce Services

• Banks, credit card companies provide account management apps
• Mobile display advertising
  – iAd, AdMob, Facebook
• Games and entertainment
  – Downloadable and streamable services
  – Games
  – Video, short films, movies, TV shows
  – Music and ring tones

Building an E-commerce Web Site

• Pieces of the site-building puzzle
• Assembling a team with the skills required to make decisions about:
  – Technology
  – Site design
  – Social and information policies
  – Hardware, software, and telecommunications infrastructure
• Customer’s demands should drive the site’s technology and design.

Building an E-commerce Web Site

• Business objectives
  – The capabilities the site should have
    • Business decisions should drive technology
  – Example: execute a transaction payment

• System functionality
  – Technology needed to achieve objective
  – Example: a shopping cart or other payment system

• Information requirement
  – Specific data and processes needed
  – Example: secure credit card clearing, multiple payment options

Building an E-commerce Web Site

• Alternatives in building the Web site:
  – Completely in-house
  – Mixed responsibility
  – Completely outsourced
    • Co-location

• Web site budgets
  – Several thousand to millions per year
  – 50% of budget is system maintenance and content creation

Choices in Building and Hosting Web Sites

In-house

- COMPLETELY IN-HOUSE
  - Build: In
  - Host: In

Outsource

- MIXED RESPONSIBILITY
  - Build: Out
  - Host: In

- COMPLETELY OUTSOURCED
  - Build: Out
  - Host: Out

Components of a Web Site Budget

- Hardware: 10%
- Marketing: 20%
- Design: 30%
- Content development: 15%
- Software: 10%
- Hosting service: 10%
- Telecommunications: 5%

2016/12/27
Midterm Report (期末報告)

• 請各組組長整理期末報告資料檔案，
於2016/12/27(週二)上午10:00前，
完成Email寄出以下兩個壓縮檔的下載連結，
給所有組員和老師 (正本to:老師，副本cc:所有組員)
。

– 1. 整組各次簡報的ppt (含整組期末報告目錄ppt) 壓縮檔
  • (例如：MI4B_資訊管理專題_第1組期末各次簡報.zip)

– 2. 整組各組員的
  [(1) 個人期末報告.ppt
  (2) 個人期末書面報告.pdf]
  之壓縮檔
  • (例如：MI4B_資訊管理專題_第1組_組員個人期末報告.zip)

資訊管理專題
(Hot Issues of Information Management)

1. 請同學於資訊管理專題個案討論前
   應詳細研讀個案，並思考個案研究問題。

2. 請同學於上課前複習相關資訊管理相關理論，
   以作為個案分析及擬定管理對策的依據。

3. 請同學於上課前
   先繳交資訊管理專題個案研究問題書面報告。

4. 上課時間地點：
   週二 3,4 (10:10-12:00) B507
