# Overview of Fundamental MIS Concepts

## using an integrated framework for describing and analyzing information systems

- Develop new production processes
- Develop new management techniques
- Increase use of data by managers
- Build new business production processes
- Train new channels of information flow
- Train employee in use of the systems
- Develop GPS systems for field use
- Create email links with operators
- Develop data base to receive information

# Information Systems in Global Business

1. How are information systems transforming business and what is their relationship to globalization?
2. Why are information systems so essential for running and managing a business today?
3. What exactly is an information system? How does it work? What are its management, organization, and technology components?
4. What are complementary assets? Why are complementary assets essential for ensuring that information systems provide genuine value for an organization?
5. What academic disciplines are used to study information systems? How does each contribute to an understanding of information systems? What is a sociotechnical systems perspective?

# How information systems are transforming business

- Emerging mobile digital platform
- Growing business use of “big data”
- Growth in cloud computing

# Globalization opportunities

- Internet has drastically reduced costs of operating on global scale
- Increases in foreign trade, outsourcing
- Presents both challenges and opportunities

# The Interdependence Between Organizations and Information Technology

# Strategic Business Objectives of Information Systems

1. Operational Excellence
2. New Products, Services and Business Models
3. Customer and Supplier Intimacy
4. Improved Decision Making
5. Competitive Advantage
6. Survival

# 1. Operational Excellence

- Improvement of efficiency to attain higher profitability
- Information systems, technology an important tool in achieving greater efficiency and productivity
- Walmart's Retail Link system links suppliers to stores for superior replenishment system

## 2. New Products, Services, and Business Models

- **Business model:** describes how company produces, delivers, and sells product or service to create wealth
- Information systems and technology a major enabling tool for new products, services, business models
  - Examples: Apple's iPad, Google's Android OS, and Netflix

# 3. Customer and Supplier Intimacy

- Serving customers well leads to customers returning, which raises revenues and profits.
  - Example: High-end hotels that use computers to track customer preferences and used to monitor and customize environment
- Intimacy with suppliers allows them to provide vital inputs, which lowers costs.
  - Example: JCPenney's information system which links sales records to contract manufacturer

# 4. Improved Decision Making

- Without accurate information:
  - Managers must use forecasts, best guesses, luck
  - Results in:
    - Overproduction, underproduction
    - Misallocation of resources
    - Poor response times
  - Poor outcomes raise costs, lose customers
- Example:
  - Verizon's Web-based digital dashboard to provide managers with real-time data on customer complaints, network performance, line outages

# 5. Competitive advantage

- Delivering better performance
- Charging less for superior products
- Responding to customers and suppliers in real time
- Examples: Apple, Walmart, UPS

## 6. Survival

- Information technologies as necessity of business
- Industry-level changes
  - Example: Citibank's introduction of ATMs
- Governmental regulations requiring record-keeping
  - Examples: Toxic Substances Control Act, Sarbanes-Oxley Act

# Information Systems Are More Than Computers

# Dimensions of Information Systems

- **Organizations**

- People, structure, business processes, politics, and culture.

- **Management**

- Make sense out of the many situations faced by organizations, make decisions, and formulate action plans to solve organizational problems.

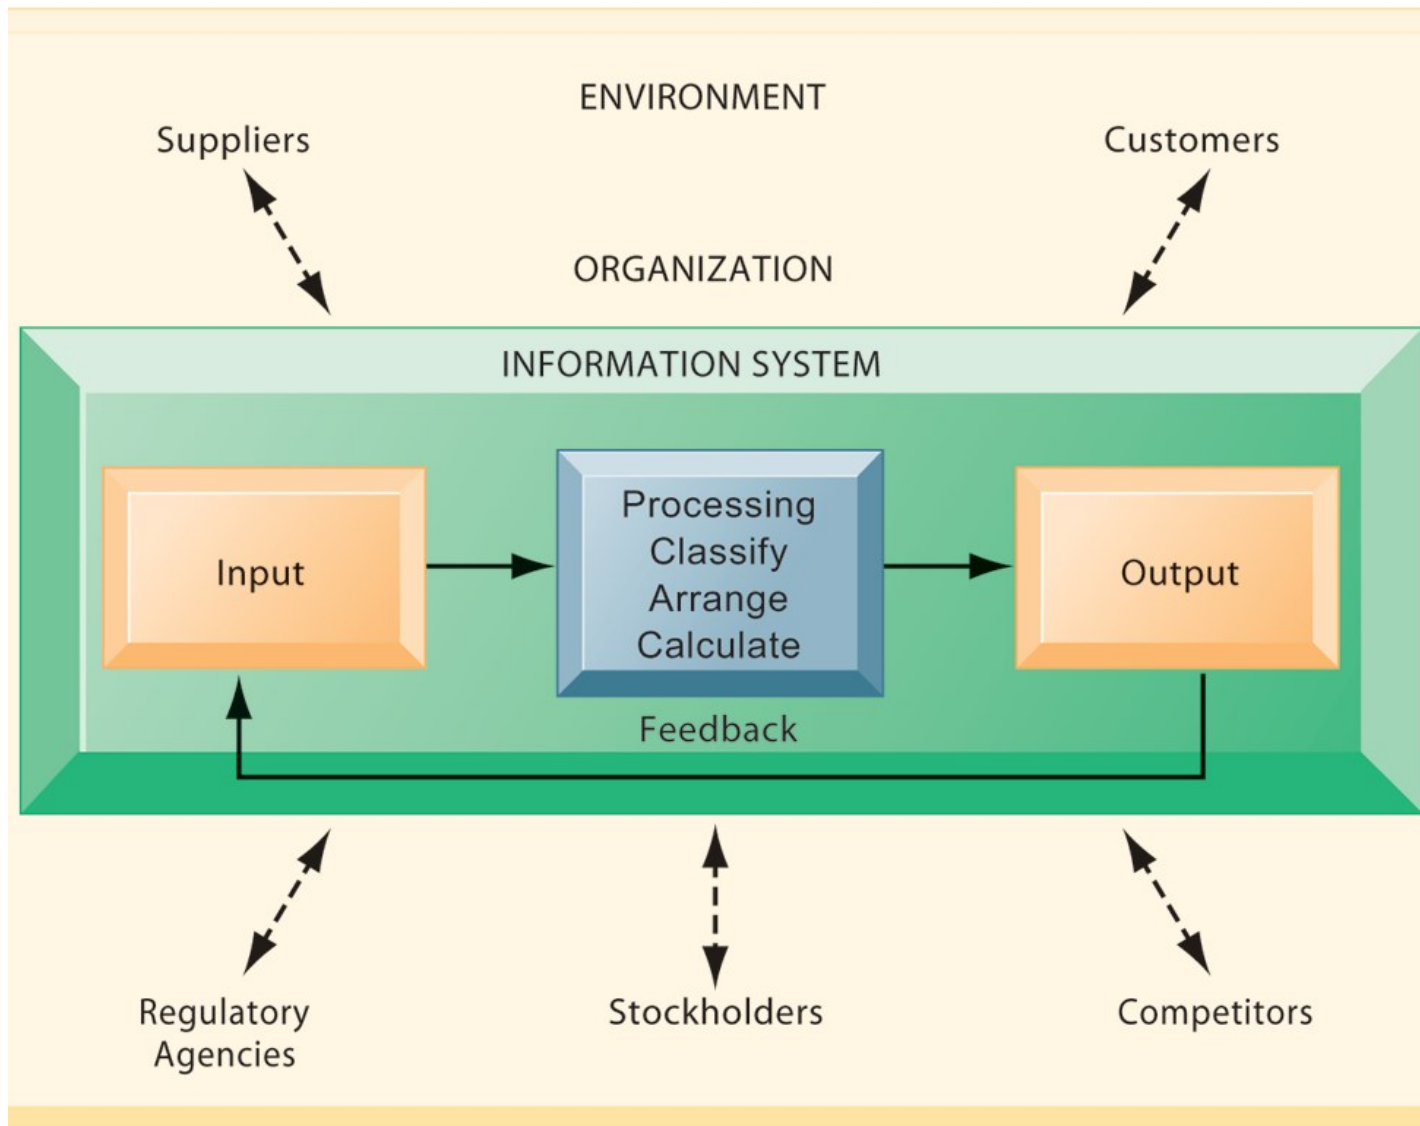

- **Information Technology**

- Computer hardware, software, data management technology, networking and telecommunications technology

# Business Model Generation

# Business Model Generation

### Production and Logistics

Anything beyond content creation is outsourced to readily available service providers.

### Differentiation

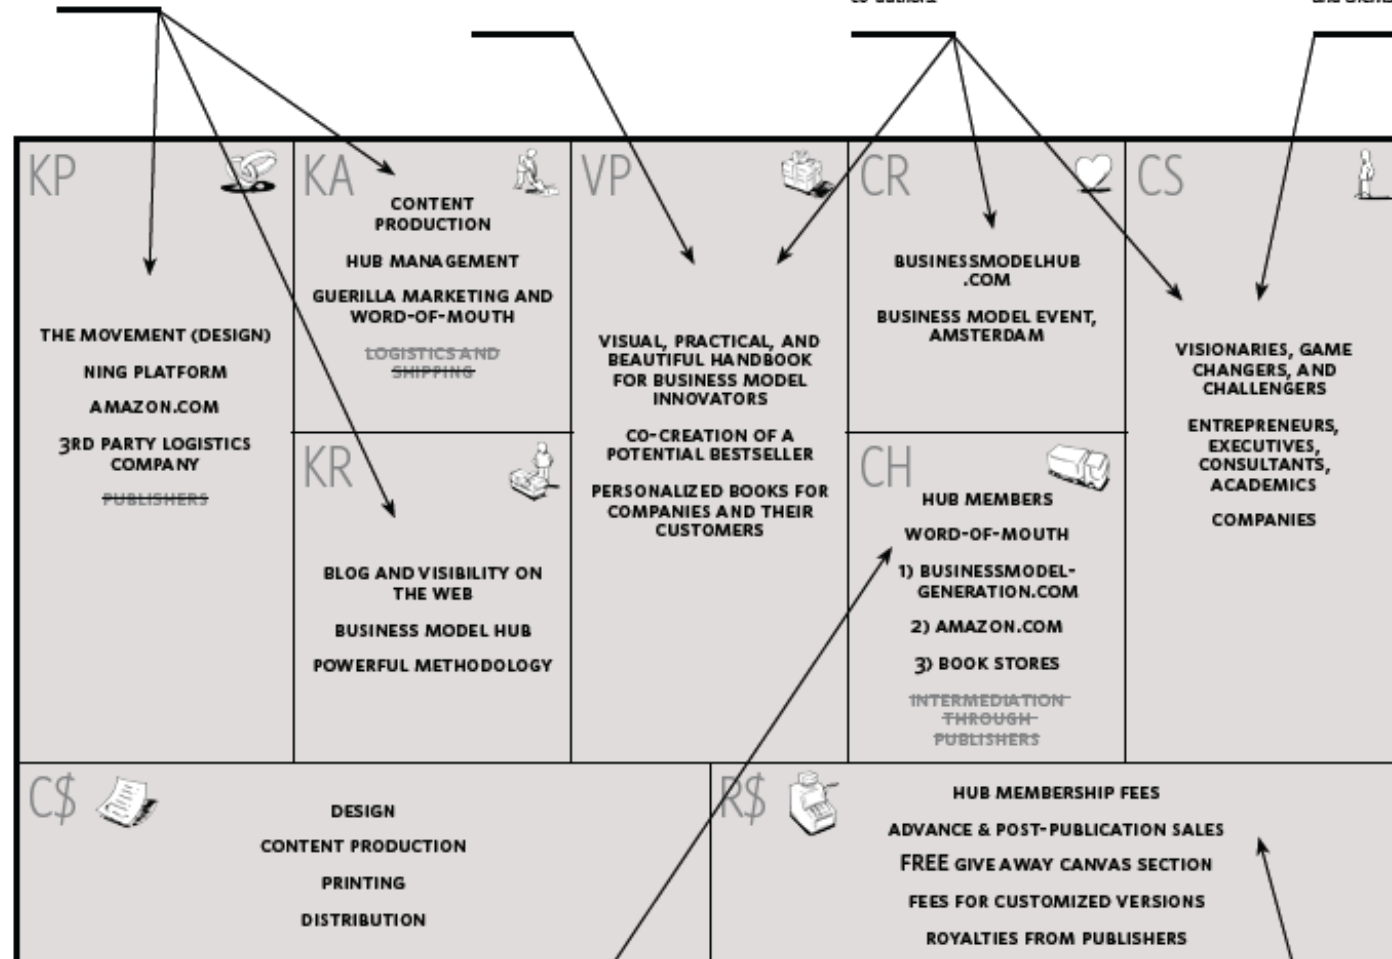

An entirely different format, business model, and story for the book makes it stand out in a crowded market.

### Community

The book is co-created with practitioners from around the world who feel ownership thanks to attribution as contributing co-authors.

### Buyers

Paying customers are not only readers, but co-creators and companies that want customized books for their employees and clients.

## THE CANVAS OF BUSINESS MODEL GENERATION

### Reach

A mix of direct and indirect Channels and a phased approach optimizes reach and margins. The story of the book lends itself well to viral marketing and word-of-mouth promotion.

### Revenues

The book was financed through advanced sales and fees paid by co-creators. Additional revenues come from customized versions for companies and their clients.
